---

Barry, I got your message regarding this site's TDDs' issues. Hopefully we can talk early next week and get some mods going.

I have only heard from CSC thus far about the following important issue.

In the copy of Reference 6 (ARR) we received on CD, the document is in two parts and the second part (476 pages long) is not paginated. This is pretty important since, of course, it is the reference cited for the analytical data used to support the score. It is Reference package related and will require you to get pagination on the data sheets as soon as possible so that there are no further delays with the review.

Please let me know if you have any questions.

Sincerely,

Sabrina Forrest
